**WHAT IS BLACK PRIVILEGE?**

Black privilege is being able to take pride in your race without fear of persecution.

Black privilege is when people assume you are poor because of racism, not because you're lazy.

Black privilege is being wealthy without people assuming your wealth was handed to you or that you exploited others.

Black privilege is being able to commit violent crimes against another race without people assuming you are racist.

Black privilege is being given "affirmative action" which advantages you in jobs and colleges based on your skin tone.

Black privilege is having the media cover up your race in the event of a black flash mob or a gruesome murder.

Black privilege is being able to make insensitive comments about other races and not being called out on it.

Black privilege is when people assume that the police pulled you over because of racism, not because you were speeding.

Black privilege is being able to preserve and promote your culture and having your culture protected from criticism.

Black privilege is being able to blame your shortcoming on racism.

Black privilege is when people consider you to be superior at sports or 'better in bed' without it being considered racist.

Black privilege is nothing more than your belief of offending minorities.

Black privilege is having the establishment lie to cover up problems in your community or protect you from criticism.

Black privilege is when you can be overrepresented in a certain field without people trying to amend the law.

Black privilege is having the government pander to your interests in order to get the "black vote".

Black privilege is having Hollywood always present your race in positive light.

Against the hate crime of Asian Americans is skrevet af kollektivet Remember & Resist og udkom med deres udgivelse: Abolitionist approaches to Asian Hate Crime. The Teksten placerer overfald mod Asian, Asian-Pacific, and South Asian people in a broader context of racist structures and anti-Asian violence. This forces different communities into competition with each other for state recognition and limited funding for their causes, which erases certain communities and discourages building across difference to fight the systems that oppress us all. Channelling energy into punishment of individual perpetrators delivers just that: punishment, not safety. Whilst failing to address the root causes of racism and its manifestations, and ignoring the structural racism of the police and structural racism in general. As East and Southeast Asian diaspora organisers, we are very much alive to the fact that there exist various and complex dynamics between and within our homelands that are not reducible to their relationships to US imperialism. Why should they have the right to control the way I choose to wear my halo? Lack of community and support systems make people vulnerable to violence and its after-effects. Tackling the root causes of isolation and lack of support, such as gentrification which breaks communities apart, and austerity which has decimated support services, as well as community and youth centres and the support networks they create. Building solidarity between different East and Southeast Asian groups, across class, and intergenerationally through community support work, grassroots anti-racist union work and other forms of mutual aid. Building analyses that connect anti-Asian racisms to other forms of racism and forms of oppression with a global perspective: there is racism in our ancestral homelands that many of us benefit from and a system of global capitalism that underlies racialization. Specializing so that we can practice the intervention of the spectator, the de-scheduling and self-defense, and to feel more qualified to intervene or get up for us in situations of assistance. See Tweet by @linhtropy [twitter.com/Linhtropy>Status/1374080350624772096?s=20], although we need to develop strategies to deal with racist attacks when they arise, the framework of "crime" can distract us from recognizing they as well. As symptoms of deeper issues to be addressed. He deserves to be considered like this. Also in the distance of Asian American and Asian Pacific communities - Asian Pacific and is disconnected from a broader anti-racist fight. For many, it is a symbol of lack of discipline, something that we are soft to be "hired". The Model Minority is a serious challenge that we must meet. No, I'm not. We need to recognize the polish as an institution that defends the White and resist the carceral and punitive approaches for racist racists.
